

# Don't waste any more time or money on your computer system!

## Leave your computer management to SEL and watch your business improve

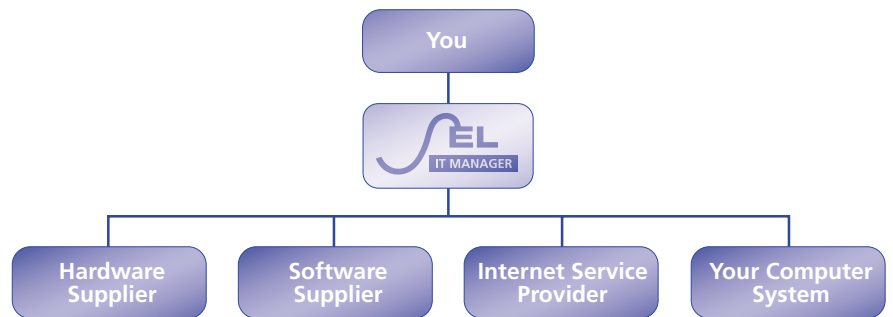

### Your annual fee includes: -

- Technical support
- Troubleshooting
- System management
- Technical consultancy
- Computer network design
- Disaster recovery and business contingency advice

### In addition to these services your fee also includes: -

- A routine service programme
- Preventative maintenance
- Customised call outs
- All labour
- Software patches/updates/bug fixes
- Unlimited email support
- Unlimited telephone hotline support

SEL's IT Manager service is just like having your own IT department. IT Manager takes care of everything from dealing with suppliers when things go wrong or obtaining and installing software upgrades, to evaluating new technologies and attending meetings on your behalf. Leave IT Manager to sort out your system documentation and IT administration. If you have a technical question or problem, just pick up the phone. Installing your software, networking your computers, getting you online, making your system secure...don't waste a second of your valuable time on it. With SEL's IT Manager service it will all be taken care of by properly qualified IT engineers.

### SEL's IT Manager service gives you:

- Greater business efficiency from having your computer system properly configured and managed by qualified IT engineers
- Peace of mind from knowing that help is always just a phone call away
- Time to get on with your job instead of wasting it on computer problems
- Less down time from computer crashes
- Better value from your system
- Professional, objective advice on technical issues that works solely in your best interest
- Freedom from having to deal with salesmen who confuse you with technology

SEL's engineers are fully qualified IT professionals with many years of experience managing company computer systems. For a small annual fee that is a fraction of what it would cost to have a qualified IT engineer on your payroll or to employ a consultant, you can have the full range of IT management services whenever you need them.
